

● *Call for Papers*

A Special *in Memoriam* Issue for Peter Neil Temple Wells, 1936 – 2017, *Ultrasound in Medicine and Biology* Emeritus Editor

For over 50 years, Prof. Peter N T Wells contributed substantially to the field of medical ultrasound. In recognition of his outstanding achievements, Profs. Christy K. Holland, Editor-in-Chief, and Gail ter Haar, Deputy Editor, of *Ultrasound in Medicine and Biology*, announce a *call for papers* for a special collection that will be published in an issue celebrating Prof. Wells' life and work. Along with an In Memoriam foreword, these papers will comprise contributions in honor of Prof. Wells. These will most appropriately focus on all areas related to Prof. Wells' major interests: diagnostic ultrasound imaging, phase insensitive tomography, Doppler ultrasound, ultrasonic surgery, ultrasound power measurement,

ultrasound bioeffects and related areas. We also especially encourage review articles. Authors who intend to submit a review paper should first discuss the topic with Prof. Holland or Prof. ter Haar.

Our intent is to have a rich set of papers submitted by January 1, 2018. These will be peer reviewed in the customary manner and, allowing time for the entire review process, the issue containing the In Memoriam collection will be published to mark the one-year anniversary of his death in April 2018. Researchers in medical ultrasound are encouraged to prepare a submission for this tribute. The cover letter should include a note of intent for the Special Issue for Prof. Wells and be submitted with the manuscript by January 1, 2018. Please follow the *Ultrasound in Medicine and Biology* author guidelines: <https://www.elsevier.com/journals/ultrasound-in-medicine-and-biology/0301-5629/guide-for-authors>.
