

# Ultrasound in medicine and biology

Volume 43 Number 10

2017

## CONTENTS

### ● REVIEW

#### **Freehand 3-D Ultrasound Imaging: A Systematic Review**

Mohammad Hamed Mozaffari, and Won-Sook Lee

2099

### ● ORIGINAL CONTRIBUTIONS

#### **Training Midwives to Perform Basic Obstetric Point-of-Care Ultrasound in Rural Areas Using a Tablet Platform and Mobile Phone Transmission Technology—A WFUMB COE Project**

Sudhir Vinayak, Joyce Sande, Harvey Nisenbaum, and Christian Pállson Nolsøe

2125

#### **Comparing Performance of Combinations of Shear Wave Elastography and B-Mode Ultrasound in Diagnosing Breast Masses: Is It Influenced by Mass Size?**

Rui Cong, Jing Li, and Xuejiao Wang

2133

#### **A Model-Based Prediction of the Probability of Hepatocellular Adenoma and Focal Nodular Hyperplasia Based on Characteristics on Contrast-Enhanced Ultrasound**

Pavel Taimr, Mirelle E. E. Bröker, Roy S. Dwarkasing, Bettina E. Hansen, Robert J. de Knecht, Robert A. De Man, and Jan N. M. IJzermans

2144

#### **Histology-Based Assessment of Sonazoid-Enhanced Ultrasonography for the Diagnosis of Liver Metastasis**

Kazufumi Kobayashi, Hitoshi Maruyama, Soichiro Kiyono, Osamu Yokosuka, Masayuki Ohtsuka, Masaru Miyazaki, Jun Matsushima, Takashi Kishimoto, and Yukio Nakatani

2151

#### **Ultrasound-Based Shear Wave Elastography in the Assessment of Patients with Diabetic Kidney Disease**

Flaviu Bob, Iulia Grosu, Ioan Sporea, Simona Bota, Alina Popescu, Alexandra Sima, Roxana Șirli, Ligia Petrica, Romulus Timar, and Adalbert Schiller

2159

#### **Minimally Complex Renal Cysts: Outcomes and Ultrasound Evaluation Compared with Contrast-Enhanced Cross-Sectional Imaging Bosniak Classification**

Marilia Henrique Destefani, Jorge Elias Jr., Annelise Manzano Serra Negra Trazzi, Plinio Prizon Kajiwarra, Aila Ferreira de Menezes, Rodolfo Borges dos Reis, and Valdair Francisco Muglia

2167

#### **Transabdominal Ultrasound Colonography for Detection of Colorectal Neoplasms: Initial Clinical Experience**

Jin-Ya Liu, Li-Da Chen, Jian-Bo Xu, Hui Wu, Jin-Ning Ye, Xin-Hua Zhang, Xiao-Yan Xie, Wei Wang, and Ming-De Lu

2174

|                                                                                                                                                                                                                                                                                                                                                                                           |      |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Correlation between Disease Activity and Endorectal Ultrasound Findings of Chronic Radiation Proctitis</b><br>Fei Cao, Teng-hui Ma, Guang-jian Liu, Yan-Ling Wen, Huai-ming Wang, Ying-yi Kuang, Si Qin, Xiao-yin Liu,<br>Bin-jie Huang, and Lei Wang                                                                                                                                  | 2182 |
| <b>Effect of Preterm Birth on Echogenicity in Basal Ganglia</b><br>Robbin de Goederen, Marlou M. A. Raets, Ginette M. Ecury-Goossens, Rogier C. J. de Jonge, Luca A. Ramenghi,<br>Irene V. Koning, Paul Govaert, and Jeroen Dudink                                                                                                                                                        | 2192 |
| <b>Hybrid Photoacoustic/Ultrasound Tomograph for Real-Time Finger Imaging</b><br>Milan Oeri, Wolfgang Bost, Nicolas S  n  gond, Steffen Tretbar, and Marc Fournelle                                                                                                                                                                                                                       | 2200 |
| <b>Common Carotid Artery Flow Measured by 3-D Ultrasonic Vector Flow Imaging and Validated<br/>with Magnetic Resonance Imaging</b><br>Simon Holbek, Kristoffer Lindskov Hansen, Hamed Bouzari, Caroline Ewertsen, Matthias Bo Stuart,<br>Carsten Thomsen, Michael Bachmann Nielsen, and J  rgen Arendt Jensen                                                                             | 2213 |
| <b>A Temporal and Spatial Analysis Approach to Automated Segmentation of Microbubble Signals<br/>in Contrast-Enhanced Ultrasound Images: Application to Quantification of Active Vascular<br/>Density in Human Lower Limbs</b><br>Wing Keung Cheung, Katherine J. Williams, Kirsten Christensen-Jeffries, Brahman Dharmarajah,<br>Robert J. Eckersley, Alun H. Davies, and Meng-Xing Tang | 2221 |
| <b>Reproducible Computer-Assisted Quantification of Myocardial Perfusion with Contrast-Enhanced<br/>Ultrasound</b><br>Yuanwei Li, Navtej Chahal, Roxy Senior, and Meng-Xing Tang                                                                                                                                                                                                          | 2235 |
| <b>Non-invasive Evaluation of Right Ventricular Function with Real-Time 3-D Echocardiography</b><br>Ran Chen, Meihua Zhu, Kacie Amacher, Xia Wu, David J. Sahn, and Muhammad Ashraf                                                                                                                                                                                                       | 2247 |
| <b>Reproducibility and Angle Independence of Electromechanical Wave Imaging for the Measurement<br/>of Electromechanical Activation during Sinus Rhythm in Healthy Humans</b><br>Lea Melki, Alexandre Costet, and Elisa E. Konofagou                                                                                                                                                      | 2256 |
| <b>Unmyelinated Peripheral Nerves Can Be Stimulated <i>in Vitro</i> Using Pulsed Ultrasound</b><br>Christopher J. Wright, Seyyed R. Haqshenas, John Rothwell, and Nader Saffari                                                                                                                                                                                                           | 2269 |
| <b>Ultrasonography Improves Glycemic Control by Detecting Insulin-Derived Localized Amyloidosis</b><br>Minoru Kikuchi, Naoki Hirokawa, Seiya Hagiwara, Hidetaka Nakayama, Shinji Taneda, Naoki Manda,<br>and Kouichi Sakata                                                                                                                                                               | 2284 |
| <b>Sonodynamic Therapy Based on Combined Use of Low Dose Administration of Epirubicin-Incorporating<br/>Drug Delivery System and Focused Ultrasound</b><br>Masanori Maeda, Yoshihiro Muragaki, Jun Okamoto, Shin Yoshizawa, Nobutaka Abe, Hidekazu Nakamoto,<br>Hiroshi Ishii, Kenichi Kawabata, Shinichiro Umemura, Nobuhiro Nishiyama, Kazunori Kataoka,<br>and Hiroshi Iseki           | 2295 |
| <b>Effect of Frequency and Focal Spacing on Transcranial Histotripsy Clot Liquefaction, Using Electronic<br/>Focal Steering</b><br>Tyler Gerhardson, Jonathan R. Sukovich, Aditya S. Pandey, Timothy L. Hall, Charles A. Cain, and Zhen Xu                                                                                                                                                | 2302 |
| <b>Ultrasound-Induced Bubble Clusters in Tissue-Mimicking Agar Phantoms</b><br>Pooya Movahed, Wayne Kreider, Adam D. Maxwell, Barbrina Dunmire, and Jonathan B. Freund                                                                                                                                                                                                                    | 2318 |
| <b>Variation of High-Intensity Therapeutic Ultrasound (HITU) Pressure Field Characterization: Effects<br/>of Hydrophone Choice, Nonlinearity, Spatial Averaging and Complex Deconvolution</b><br>Yunbo Liu, Keith A. Wear, and Gerald R. Harris                                                                                                                                           | 2329 |

|                                                                                                                                                                                                                                                                                                                                                              |      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Supersonic Shear Wave Imaging of the Spleen for Staging of Liver Fibrosis in Rats</b><br>Xiang-Dong Hu, Hui-Ying Geng, Lei Wang, Hu-Feng Xu, Yuan Su, Si Liang, and Lin-Xue Qian                                                                                                                                                                          | 2343 |
| <b>Evaluation of Antivascular Combretastatin A4 P Efficacy Using Supersonic Shear Imaging Technique of Ectopic Colon Carcinoma CT26</b><br>Johanne Seguin, Nathalie Mignet, Heldmuth Latorre Ossa, Mickaël Tanter, and Jean-Luc Gennisson                                                                                                                    | 2352 |
| <b>Second-look US Using Real-time Virtual Sonography, a Coordinated Breast US and MRI System with Electromagnetic Tracking Technology: A Pilot Study</b><br>Rie Watanabe, Takahito Ando, Manami Osawa, Mirai Ido, Junko Kousaka, Yukako Mouri, Kimihito Fujii, Shogo Nakano, Junko Kimura, Tsuneo Ishiguchi, Miwa Yoshida, Tsuneo Imai, and Takashi Fukutomi | 2362 |
| <b>Detecting Regional Stiffness Changes in Aortic Aneurysmal Geometries Using Pressure-Normalized Strain</b><br>Doran S. Mix, Ling Yang, Camille C. Johnson, Nathan Couper, Ben Zarras, Isaac Arabadjis, Lauren E. Trakimas, Michael C. Stoner, Steven W. Day, and Michael S. Richards                                                                       | 2372 |
| <b>Evaluation of Early Kidney Damage Caused by Brain Death Using Real-Time Ultrasound Elastography in a Bama Pig Model</b><br>Ying Tang, Jingwen Zhao, Dongyang Liu, Ningning Niu, and Huimin Yu                                                                                                                                                             | 2395 |
| <b>Performances and Limitations of Several Ultrasound-Based Elastography Techniques: A Phantom Study</b><br>Stéphanie Franchi-Abella, Caroline Elie, and Jean-Michel Correias                                                                                                                                                                                | 2402 |
| <b>Quantifying Image Quality Improvement Using Elevated Acoustic Output in B-Mode Harmonic Imaging</b><br>Yufeng Deng, Mark L. Palmeri, Ned C. Rouze, Gregg E. Trahey, Clare M. Haystead, and Kathryn R. Nightingale                                                                                                                                         | 2416 |
| <b>Random Forest-Based Bone Segmentation in Ultrasound</b><br>Nora Baka, Sieger Leenstra, and Theo van Walsum                                                                                                                                                                                                                                                | 2426 |
| <b>Automatic Identification of the Optimal Reference Frame for Segmentation and Quantification of Focal Liver Lesions in Contrast-Enhanced Ultrasound</b><br>Spyridon Bakas, Dimitrios Makris, Gordon J. A. Hunter, Cheng Fang, Paul S. Sidhu, and Katerina Chatzimichail                                                                                    | 2438 |
| <b>Prediction for Improvement and Remodeling in First-Onset Myocardial Infarction by Speckle Tracking Echocardiography: Is Global or Regional Selection Better?</b><br>Bo Hu, Qing Zhou, Jinling Chen, Tuantuan Tan, Xue Yao, Hongning Song, and Ruiqiang Guo                                                                                                | 2452 |
| <b>Image Monitoring of the Impaired Phagocytic Activity of Kupffer Cells and Liver Oxygen Saturation in a Mouse Cholangitis Model Using Contrast-Enhanced Ultrasound Imaging and Photoacoustic Imaging</b><br>Seunghyun Lee, Jung Hoon Kim, Jae Hwan Lee, and Seo-Youn Choi                                                                                  | 2461 |
| <b>Quantitative Analysis of Hepatic Microcirculation in Rabbits After Liver Ischemia-Reperfusion Injury Using Contrast-Enhanced Ultrasound</b><br>Haiyuan Li, Jingning Lu, Xiaofeng Zhou, Denghua Pan, Dequan Guo, Haiying Ling, Hong Yang, Yun He, and Gang Chen                                                                                            | 2469 |
| <b>Vector and Doppler Ultrasound Velocities Evaluated in a Flow Phantom and the Femoropopliteal Vein</b><br>Thor Bechsgaard, Kristoffer Lindskov Hansen, Andreas Hjelm Brandt, Simon Holbek, Julie Lyng Forman, Charlotte Strandberg, Lars Lönn, Niels Bækgaard, Jørgen Arendt Jensen, and Michael Bachmann Nielsen                                          | 2477 |
| <b>● TECHNICAL NOTES</b>                                                                                                                                                                                                                                                                                                                                     |      |
| <b>Optimizing Sensitivity of Ultrasound Contrast-Enhanced Super-Resolution Imaging by Tailoring Size Distribution of Microbubble Contrast Agent</b><br>Fanglue Lin, James K. Tsuruta, Juan D. Rojas, and Paul A. Dayton                                                                                                                                      | 2488 |

**Hypothesis of Improved Visualization of Microstructures in the Interventricular Septum with Ultrasound and Adaptive Beamforming**

Ole Marius Hoel Rindal, Svend Aakhus, Sverre Holm, and Andreas Austeng 2494

**Accounting for the Spatial Observation Window in the 2-D Fourier Transform Analysis of Shear Wave Attenuation**

Ned C. Rouze, Yufeng Deng, Mark L. Palmeri, and Kathryn R. Nightingale 2500

● **LETTER TO THE EDITOR**

**Spatio-temporal Image Correlation (STIC): Estimation of Heart Rate Using STIC Compared with 2-D Pulsed Wave Doppler in a Flow Phantom**

Gordon N. Stevenson, Reza Keshavarzi, Ana Gomes de Melo Tavares Ferreira, Tracie Barber, and Alec W. Welsh 2507

● **CALENDAR** 2509
